Manufacturing Capabilities Secondary Processing Quality Control

CNC and Manual Lathes:

4 new CNC lathes, with up to 31" bar capacity and machining lengths to 47". Two of these machines have live tooling capabilities.

2 new Flatbed CNC Lathes with 5.5" and 7" spindle bores. Length of work piece up to 120". We are well set up for Down hole tool component production.

4 Manual Lathes with swing up to 26" and 90" work piece length.

Milling:

3 CNC machining centers with a milling stroke up to 84" and very large part capacity. Ideal for large bonnets, flanges and castings.

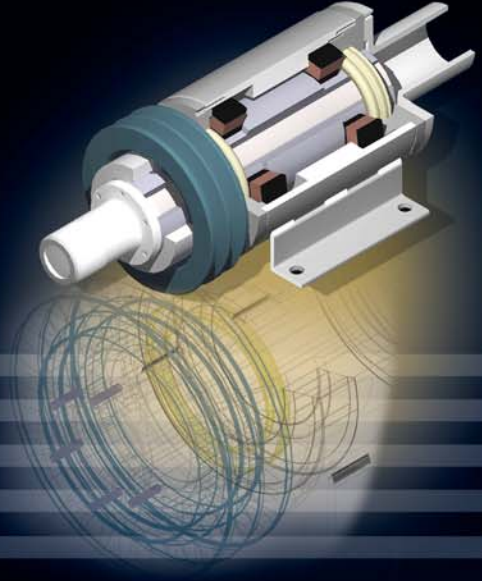

2 manual mills for small part runs.

Drilling:

Manual drilling up to 2" diameter and a 40" stroke. (Deep hole drilling up to 120" is also available)

ons in Manufacturing

Saw Cutting/Material Handling:

Automated saw cutting of bar up to 11" diameter and up to 2000 Lbs in weight. We have 10,000 Lb overhead lift capacity, fork lifts, jib cranes and many other material handling devices.

Secondary Processing:

Quantum Industries can also provide secondary part processes such as nitriding, carburizing, corrosion resistant coatings, heat treating, shot peening and hard facing.

Welding:

Working with our approved welding sub-contractor, we can provide turn key part production.

Quality:

Quality manufacturing is our prime focus at Quantum Industries. We want it to be right the first time and every part is inspected prior to being shipped to you.

If you have special quality control requirements, please let us help you become more profitable with our turnkey QC inspection services.

Equipment design/Engineering Valve actuator adaptation Turn-key manufacturing

Equipment Design/Engineering:

We can provide complete design, drawing and engineering services. Our 3-D CAD capabilities enable us to show what your parts look like prior to production.

Turn-key Manufacturing:

Do you need someone to take your idea and build it for you? We provide complete turnkey design and manufacturing capabilities in small or large quantities.

Valve Actuation/Adaptation:

We provide complete actuation services for linear and quarter turn valves. Our services include design, mounting brackets, adapter stems and actuator adaptation. We also produce the "Quantum" line of Linear valve actuators.
